Who We Are

ECSIG
Resources

Greg Gardner

We are a group of Computer Science students with a passion for technology.

We come together to exchange ideas and learn more about the tools and concepts that make Computer Science fun.

Comp.Sci. is boring bro, why even bother?

False! Comp. Sci. is awesome and constantly changing. If you dislike using a tool or rewriting the same old code, chances are someone else has been there and written something better. Exploring new solutions is what our profession is all about!

What We Are

ECSIG
Resources

Greg Gardner

We are URI's ACM student chapter.

E.C.S.I.G stands for:

- **E**ngineering
- **C**omputer
- **S**cience
- **I**nterest
- **G**roup

Resources: Communication

ECSIG
Resources

Greg Gardner

- **IRC** – irc.ecsig.com
Our main channel of communication, where we casually talk about programming, course material, lolcatz, etc.
- **Forums** – forums.ecsig.com
Discussions about projects, presentations, and workshops.
- **Weekly Meetings**
Tuesdays at 5:30pm in Tyler 055.
- **Google Hangouts**
Hangouts are used for members that cannot attend meetings in person, as well as for organising impromptu discussions.

Resources: Projects

ECSIG
Resources

Greg Gardner

ECSIG is a community for learning and discovery. We are active in many ways.

- **Presentations**

Members often volunteer to present cool stuff at meetings.

- **Workshops**

Events for teaching non-members critical software engineering skills. Roughly once or twice a semester.

- **Side Projects**

Members are encouraged to do their own projects and present them.
